

Master of Blades Report, September 2006  
Prepared October 3, 2006  
Authored by Lord Surtr Ukkonen, MoB Seagirt

Practices:

Noon Sunday at Craigflower Elementary School; however, we have now moved back to the Drill Shed at the Naden Naval Base. Attendance has this month been between two and four people per practice. There have also been an additional three practices to accomodate St. Giles and to sucker in new fighters.

Equipment: I currently do not have the list of Iron Key equipment, but it's all there and in my possession.

Experiments: For the past three and a half years we have been running an experiment wherein we test the viability of using silicone and polyurethane bonding agents in lieu of the standard hot glue in the construction of fiberglass blades. Not only have we heard precious little back on the subject, but it may become a moot point as there is an idiotic push in place to have fiberglass blades removed from use.

Events: There was a rapier demo at the St. Giles open house, but nothing terribly formal.

Upcoming Events: Pas d'Arms, for which I do not believe there is to be a rapier component.

Noatable Incidents: Nada.
