

Master of Blades Report, February 2007
Prepared March 6, 2007
Authored by Lord Surtr Ukkonen, MoB Seagirt

Practices: Noon Sunday at the Drill shed in the Naden Naval Base in Esquimalt, and recently Wednesday nights with the Heavies. Attendance of two to eight people. This is an upswing in attendance, which is good to see.

Equipment: With the current upswing in attendance there some new equipment issues to be addressed. I am hopefully at the tail end of a metal rapier order which will see five new blades plus an undisclosed number of daggers into Seagirtian hands. I have gifted an Iron Key fiberglass rapier to Alina (someone new, not my girlfriend) in exchange for her crafting loaner armour out of the denim that has for too long sat in Iron Key (being my closet). I have future plans to get an influx of gorgets and to put in an order for some more masks as soon as wallets have recovered. I am also gifting a metal rapier from my personal collection to act as a Seagirtian tournament blade for those who do not have one of their own.

Experiments: N/A

Events: N/A

Upcoming Events: Daffodil - I will be MiC'ing our flagship tourney this year. The theme will be a late/post period french tournament style. More on that later.

Noatable Incidents: Please note that I will not be attending council this evening as something has come up which requires my attention.
